Summary

Results-driven B.Tech Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with a strong foundation in programming, data structures, and problem-solving. Skilled in developing analytical solutions, learning emerging technologies, and working collaboratively in team environments. Eager to apply technical knowledge and innovation to contribute effectively in internships and entry-level roles in software development, AI, and data-driven domains**.**

Education

GD Goenka University — Gurgaon, Haryana
Bachelor of technology in Computer Science, AIML — Sep. 2023 – Aug 2027
CGPA – 9.2

Skills

Languages: C++, Python, SQL , C
Web Development: React.js, HTML5, CSS3, Node.js, REST APIs, MongoDB, MongoDB Atlas, MySQL, Render, Netlify, Git, GitHub
ML & Data: NumPy, Pandas, Scikit-learn, Matplotlib, Supervised Learning: Linear Regression, Logis c Regression, Decision Trees,
Random Forest, SVM; Unsupervised Learning: K-Means, PCA; Data preprocessing, feature engineering, model evaluate on.
Coursework: Data Structures and Algorithms, OOPS, DBMS, OS, CN
Personal Competencies: Problem Solving, Analy Cal & Technical Skills, Teamwork, Communication.

Projects

Attendance System | Python, OpenCV, NumPy, Machine Learning — June 2025 - Present

- Developed a real time face recognition system to automate student attendance.
- Implemented Haar Cascade and ML-based recognition on for accurate identification.
- Optimized for low-resource environments, reducing manual effort and errors.

Student Placement Predictor | Python, Pandas, Scikit-learn — Aug 2025 – Present

- Built a classification on model to predict student placement probability.
- Performed data preprocessing, feature selection on, and model comparison.
- Improved accuracy through tuning and generated key placement insights.

Question Paper Generator System | Python, Database Management, Web Development — March 2025 – Present

- Developed a role-based question paper generation system for dean and faculty access

- Enabled faculty to upload syllabus content for automated question paper creation
- Implemented functionality to generate multiple question papers from different faculty inputs.
- Added a selection feature to choose the best question paper from multiple generated options.
- Improved academic workflow efficiency through secure access control and automated paper management

Experience

Worked as Data Analytics June 2025– July 2025

A3Logics Jaipur, Rajasthan

- Designed and developed interactive dashboards using Power BI to effectively visualize business data.
- Cleaned, transformed, and analysed raw datasets to extract meaningful insights
- Created detailed and actionable reports to support data-driven decision-making
- Integrated and managed multiple data sources, performing data modelling to improve performance
- Collaborated with cross-functional teams to understand business requirements and deliver analytical solutions within Deadlines.

AI Intern May 2025 – Aug 2025

IBM Gurugram, Haryana

- Developed a rule-based chatbot using Python to simulate human-like conversations and handle user queries
- Designed structured conversation on flows and implemented intent-based responses to enhance user interaction
- Gained hands-on experience with Natural Language Processing (NLP) concepts and chatbot architecture
- Built a dedicated chatbot for GD Goenka University enquiry system to address queries related to admissions, courses, fee structure, and campus information
- improved response accuracy by refining logic and testing across multiple user input scenarios
- Applied AI concepts in practical, real-world use cases through chatbot development.

Certifications& Publications

- AWS Solution Architecture Job Simulation — Certificate of Completion
- GenAI Powered Data Analytics Job Simulation — Tata AI/ML Certifications.
- Best presentation Award at Ideathon 3.2 – Certification of appreciation and presentation.
- Published research paper on Plant Disease Detection using AI
